Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the Zatezalo reference discloses a battery pack locking device comprising: a latching member "76" formed on a lower casing frame included in a body of a portable wireless terminal, and adapted to lock a battery pack "18" to the lower casing frame and to release the lock of the battery pack; a release button "78" integrally formed with the latching member, the button section being movable in a first direction perpendicular to the lower casing frame; a lip "66" interacting with the latching member "76" to separate the battery pack from the lower casing frame in the first direction; and a support section "30" for supporting the battery pack to allow the battery pack to be locked and lock-released in the first direction, wherein when the release button is pushed toward the lower casing frame in the first direction, the battery pack is lock-released and elastically lifted away from the lower casing frame in the first direction. However, Zatezalo et al does not expressly teach a button section and first locking section that both move downward toward the lower casing frame in a first direction perpendicular to the lower casing frame so that the battery pack is lock-released and elastically lifted away from the lower casing frame in the first direction.

Independent claims 2 and 7 are allowed for reasons stated in the Non-Final Rejection dated 9/27/07.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance.”
